### **DETAILED ACTION**

1. Claims 8-10, 21, and 22 are pending in this office action.

#### ***Allowable Subject Matter***

2. Claims 8-10, 21, and 22 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an encoding unit which combines each bit input with a plurality of additional encoding bits to form an encryption key, and updating the encryption key with a plurality of updated encoded bits. The closest prior art uses a linear feedback shift register (LFSR) to scramble the input data. The prior art is lacking in that the scrambling provided by the LFSR is "keyless" (keyless meaning that the scrambling is possible by merely shifting the register and taking the next bit at a certain location to combine with an input bit, there is no key) and only uses 1 bit to scramble an input data bit, instead of a plurality of bits to encrypt an input data bit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandon S. Hoffman whose telephone number is 571-272-3863. The examiner can normally be reached on M-F 8:30 - 5:00.
